## AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

## LISTING OF CLAIMS:

- 1-2. (canceled)
- 3. (currently amended) A method for manufacturing metallic material having a chromium-oxide passivation film formed thereon, comprising the steps of:

depositing a coating material consisting of chromium by a wet plating method onto a metallic material with a surface roughness (Ra) of not more than 1.5µm;

baking said chromium-coated metallic material formed by the wet plating method at a temperature of 100 °C to 200°C in a high-purity inert gas atmosphere; and

applying a heat treatment to said chromium-coated metallic material in an oxidizing atmosphere so as to form a chromium-oxide passivation film on said metallic material, said film having a depth and an outermost surface, said film consisting of  $Cr_2O_3$  at a depth approximately 30nm from the outermost surface, and said film providing resistance to highly degradable and corrosive gases.

## 4. (canceled)

Docket No. 8075-1055-1 Appln. No. 10/646,855

- 5. (previously presented) The method according to claim 3, wherein said oxidizing atmosphere comprises oxygen diluted by an inert gas.
- 6. (previously presented) The method according to claim 3, wherein the highly degradable and corrosive gases are silane, diborane, or phosphine.
